

Experiment No:-02

Aim:- To identify my strength and weaknesses and release my opportunities and threats (SWOT) that I pose to my growth.

objectives:- To identify my strength and weaknesses and release my opportunities & threats that I pose to my growth.

SWOT Analysis:-

- 1) **Strengths:-**
 - a] I want to be strong in foundation in computer programming.
 - b] Technical skills acquired through a ~~poor~~ practical experience.
 - c] Strong problem-solving skills gained through a complex programming.

- 2) **Weaknesses:-**
 - a] As I am a fresher, I have limited industry experience, being a student.
 - b] As I have ^{explored} ~~explored~~ a limited experience with certain tools and frameworks that commonly used in full-stack development and testing.

opportunities:-

- a] I will explore workshops, webinars, and online courses to gain exposure to a wider range of tools and frameworks in full-stack development & testing.
- b] I will participating in open-source projects to collaborate with a diverse group of developers and testers,

expanding your practical experience.

a] I will try to get relevant certificate to validate my skills & stand out in the competitive job market.

Threat: a] competition in the job market for full-stack developer and tester positions.

b] External factors like economic downturn affecting job opportunities.

~~Conclusion~~:- conclusion:-

- Leverage strengths in foundational knowledge & adaptability for full-stack development.
- Address weaknesses through targeted learning & time management improvement.
- Mitigate threats by staying updated on industry trends & continuously improving myself in my trend & honing my testing skills.
